

2025 REPORT

GENOMIC SCORES OF YOUNG IRISH MOILED BULLS

A list of the highest scoring genomic young bulls born in 2024 and bull calves born in 2025.

This list includes all high scoring bulls in this age category with a valid genotype on **7th September 2025**. Bulls that were genotyped after this date are not included unfortunately.

On the flip side....some of these bulls/bull calves that are genotyped especially through schemes in the ROI may not be entered into the herdbook yet or even birth notified on Grass-roots.

Bulls in non-Herdplus herds in the ROI that are high scoring are not included in this list as their star rating can't be viewed.

Because all these bulls are young their genomic rating is of a low reliability, around 33%.

Values that are highlighted in **green** are 5 star within breed values i.e these values are really high scoring.

Highest ranked genomic scoring young bulls born in 2024 and bull calves born in 2025
