

Classification Round-up 2025

Preface

The classification scoring system is a very useful tool for identifying the breeds best and most consistent high scoring cow families (VG and EX animals). The classification Scoring System helps owners make breeding decisions, reviewing the strengths and weaknesses of individual animals in their herd and more readily identifies for the owner, females in their herd that are strongest in maternal traits that have good conformation and structural soundness, accelerating progress within their breeding programme and ultimately will offer an improved functional suckler cow.

For breeders that are brand new to classification, the Irish Moiled Cattle Society advises that the 1st time a herd is classified, all the animals that are eligible (females over the age of 24 months that have calved, currently producing milk and bulls over the age of 18 months) but are not past their prime, should be done to gain a true and accurate picture of the herd. From then onwards, on an annual basis, breeders should get classified all their 1st calvers over the age of 24 months, and all other animals that they think will gain points from the year before. Usually, individual breeders have a set age to calve heifers for the 1st time, for e.g., 2-year-old, and so if a breeder classifies all 1st calvers year on year it will give that breeder a reference score for each animal in the herd to compare all the animals in the herd.... their classification score as a 1st calver. Animals can be classified every year, bearing in mind that they may gain more points year on year as they mature but will never drop points.

Note on bulls

Bulls can be classified from the age of 18 months onwards, however, only bulls over 2 years old can gain enough points to be categorised as Excellent. VG89 points is the maximum score that a bull under the age of 2 years old can achieve.

At 2 year old the maximum points a bull can achieve is EX90 points. (Started in July 2025)

As animals mature, they usually gain points each time they are scored if scored on an annual basis, so, younger animals with less points can be of equal or greater genetic potential to more mature animals of more points

Curraghnakeely Masterpiece **EX95-4**

The 7-year-old stock bull Curraghnakeely Masterpiece owned by Sam Smiley of Ballynahinch, Co. Down and bred by Nigel Edwards of Tempo, Co. Fermanagh achieved a classification score of EX95 four times excellent in June 2025. His body conformation is outstanding being long and deep with exceptional width which is reflected by a body score of EX96 points. He combines excellent fleshing ability with good locomotion characteristics, and he has transmitted these characteristics to many of his progeny including several mature stock bulls in pedigree Irish Moiled herds, one of the most impressive is Glassdrummond Magician 2546 owned by the Garrett family who was the Overall Supreme Champion of the International Irish Moiled Cattle Society online show 2025. Masterpiece has produced at least another two bull calves born in 2025 that are of stock bull potential. To date there has only ever been 2 bulls in the Irish Moiled breed to score higher than EX95 points and along with Masterpiece only 1 other bull has scored EX95 points.

SEAMUS CUSACK	ROI	WOODLANDS ROWAN	16 YR OLD	10	EX90	VG88	EX93	EX92	VG85

Another note;

Only 3rd calvers and above can gain enough points to be categorised as Excellent. 1st and 2nd calvers can only score a maximum of VG89 points. The maximum score a 3rd calver can achieve is EX93 points. The maximum score 4th calvers and above can score is EX97 points.

The number of calves a cow has had is also taken into account when ranking cows on their classification result. Take for example 2 cows both the same age and with the same classification score. A cow with more calves that is seen as hard working, will be ranked above a cow that has had less calves that is seen as not as hard working and would have more reason to be looking better!

GLASSDRUMMOND CHERRY 116 (M1) EX94-3

Glassdrummond Cherry 116 (M1) owned and bred by Sam Smiley of Ballynahinch, Co. Down was classified at EX94 points 3 times Excellent as a 6 year old 5th calver in June 2025, has an impressive pedigree being a third-generation Excellent cow. Her dam is Glassdrummond Cherry 41 EX93-2 and her granddam is Glassdrummond Cherry 17th EX92. Her sire is Ballylinney 1628 (M1) EX93, her grand-sire is Glassdrummond Tom 10 EX93 and her great-grand-sire is Hillview Tom EX92, 3 consecutive generation of Excellent classified bulls.

Impressively marked Cherry 116 is a hard-working cow with good milking ability from a compact udder. She walks with ease on sound legs and feet. Carries one copy of the F94L gene.

Cherry 116 is the 13 equal highest classified cow in the breed. She shares the EX94 point status with 10 other cows and only 2 other cows have scored higher than EX94 points

CURRAGHNAKEELY BLUEBELL 0482 EX94-3

Curragnakeely Bluebell 0482 EX94-3 owned by Nathalie Chitty of Market Drayton, Shropshire scored EX94 points as a 7-year-old 6th calver in November 2025.

Bred by Nigel Edwards of Tempo, Co. Fermanagh Bluebell 0482 came to Shropshire in 2022 as a 3rd calving cow classified at EX91 points. In 2023 she scored EX93 and in 2025 EX94.

In the breed, there has only ever been 2 cows classified at EX95 points and Curragnakeely Bluebell 0482 was the 11th cow in the breed to achieve EX94 points.

Bluebell produced three daughters before arriving in Shropshire, one of which is classified at EX92 points, and she has produced three sons since arriving in Shropshire, one of which is a working stock bull in Yorkshire.

Bluebell is an excellent mother and easy to work with and hoping she produces a daughter in Shropshire!

2025 Very-Good (VG) classified 2 year old 1st calving heifers

OWNER	AREA	NAME OF ANIMAL	AGE	CALVES	Final	BODY	BREED L&F	UDDER
MICHELLE MCCAULEY	NI	BURREN ROYAL PANDORA	2YR OLD	1	VG87	VG87	VG88 VG87	VG85

WILLIAM EDWARDS	NI	BALLYREAGH RUBY 6796	2YR OLD	1	VG86	VG86	VG86 VG86	VG87
NIGEL EDWARDS	NI	CURRAGHNAKEELY PENNY LEE 0625	2YR OLD	1	VG86	VG87	VG86 VG86	VG85
BRIAN O'KANE	NI	RAVELGLEN SHELLY 444	2YR OLD	1	VG85	VG86	VG85 VG85	VG85

The Department of Agriculture in all areas, is currently putting a lot of emphasis on reducing carbon emissions, though getting farmers to keep more efficient suckler cows. One of the measures of efficiency highlighted is age at 1st calving, 2-year-old calving is encouraged over 3 year old calving.

The Society have decided to publish separately all VG classified 2-year-old 1st calvers, with the view that it is these females that have huge potential and should be regarded as of a similar genetic merit as older EX classified cows.

BURREN ROYAL PANDORA VG87

Burren Royal Pandora, a 2 year old 1st calver, bred by Michelle McCauley (N&M Moilies) of Dungannon, Co. Tyrone was classified at VG87 points in June 2025. Burren Royal Pandora is bred from highly classified animals, her grandmother, Curragnakeely Pandora 7th EX94 was mated with Castledale Maurice EX94 producing her mother Burren Princess Pandora EX93 who was mated with Ballyknock Toro EX91 to produce Burren Royal Pandora VG87.

The Pandora cow family trio, consisting of mother (Princess), daughter (Royal) and grandmother (Pandora 7th) in the last number of years have each won prestigious championships titles at the NI IMCS National show, the Royal Ulster Agricultural Show and the Royal Three Counties Show, respectively.

As a breeder it is important to us to adhere to the Society's Breed Standard, focusing on structure, conformation and colour. It is a personal choice for us to classify which we have done now for many years, and it is proving an excellent breeding tool, by using EX cows and EX bulls to mate they are producing a calf of similar standard.

SOMMERVILLE TEMPLECORRAN VG87

Sommerville Templecorran a homebred 2-year-old 1st calver of Mervyn and Rachel Garrett of Carrickfergus, Co. Antrim was classified at VG87 points in June 2025.

Templecorran is a promising young cow with an outstanding pedigree. Her dam is the young heavy weight cow, Curragnakeely Lily 0509 EX91 (2nd generation Excellent classified cows) and is sired by Clandeboye Sheridan classified at VG88 at 2-year-old.

Templecorran has length and depth to her body, a sweet udder, is traditionally marked and has a docile temperament. Her first calf, a heifer born in May 2025, is shaping up nicely, showing great potential. Templecorran is currently in calf again.

We look forward to her performance in the show ring in 2026. If she takes after her dam, we can expect her to be a large, strong cow with excellent breeding capabilities and I would expect her to score higher on classification as she matures.

Preparation for the Classifier

On the day, make sure the animals to get classified are in a shed/pen adjacent to a small yard/collecting pen where each animal can be let out individually to be viewed during the classification process. Animals must be viewed on a level, hard surface.

It is very important to have the animals zootechnical certificate at hand as the classifier needs to copy the animal's details from it and will stamp the certificate with the animal's official classification score. It is also important that all animals have correct tags in them so that they can be properly identified.

CURRAGHNAKEELY CHERRY 0585 EX90

Nigel Edwards	4 yr old 2025	Curragnakeely Cherry 0585 EX90	Curragnakeely Cherry 0518 EX92	Curragnakeely Cherry 0439 EX92	Glassdrummond Cherry 58th EX95	Glassdrummond Cherry 41 EX93	Glassdrummond Cherry 17th EX92
---------------	------------------	-----------------------------------	-----------------------------------	-----------------------------------	-----------------------------------	---------------------------------	-----------------------------------

Curragnakeely Cherry 0585. A home bred cow of Nigel Edwards of Tempo, Co. Fermanagh is the 1st cow in the breed to be classified as the 6th successive generation of Excellent cows.

Sired by Derrynagarra Clarence, in June 2025 at the age of 4 years old Curragnakeely 0585 was awarded EX90 points.

Perhaps, even more remarkable about Cherry 0585 is that she calved for the 1st time at the age of 14 months (unintentionally) and has calved every 11 months after her 1st calf.
